

My Product List

1. Introduction

This functionality allows an anonymous user (i.e. an installer who is not a customer of Danfoss and therefore does not have Product Store credentials), to create a list of products they wish to have quoted or would like to order. This list can then be shared via a URL link with a Danfoss partner who can log into Product Store and either save the list and/or add them to the cart to either export as a quote or put them on order.

It can also be used by a known user (someone with a Product Store account) with limited access (i.e. Browser visibility role) who does not have access to the cart to e-mail a URL link to a user in their organization with Buyer capabilities or load them into the cart and place the order with Danfoss.

2. How to create a My Product List

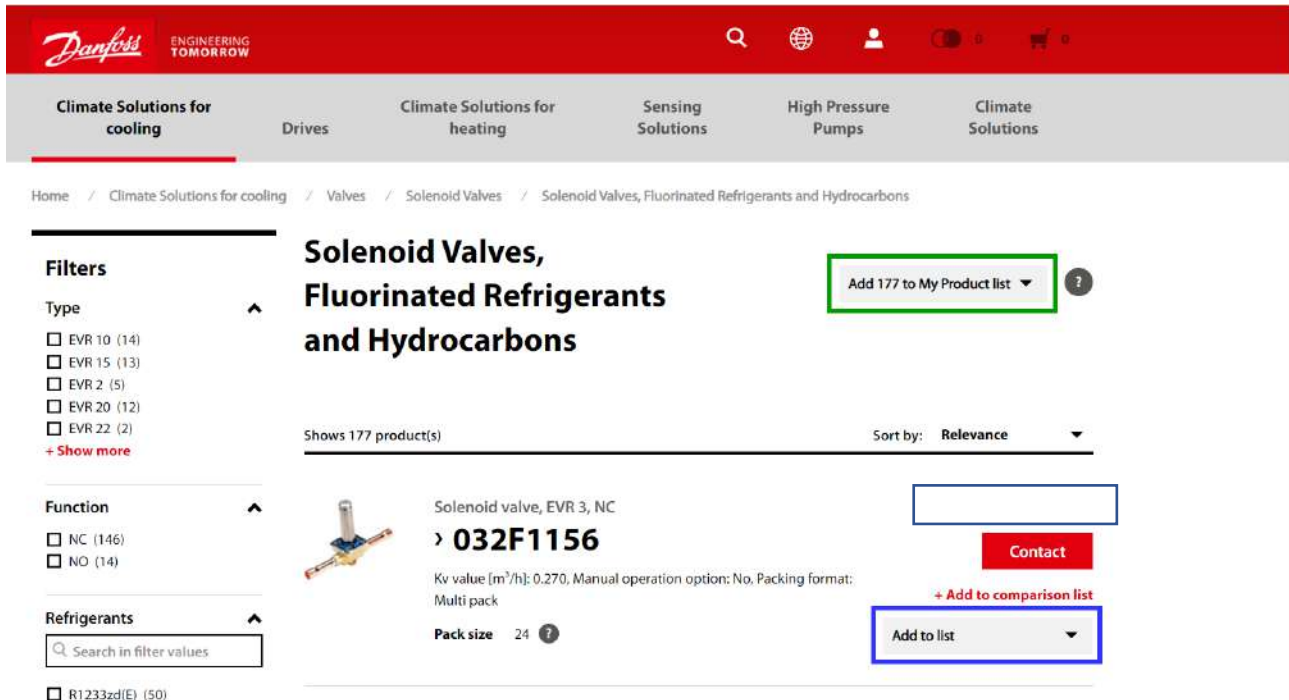

In the catalog of the Store, a user (anonymous or known) can search for specific products (or a list of products) and add them to the My Product List.

For anonymous users, to add all the items from the list into My Product List, the user would click the hyperlink highlighted in the green box in the screen shot below. To add one particular item from the list, then they would use the hyperlink highlighted in the blue box.

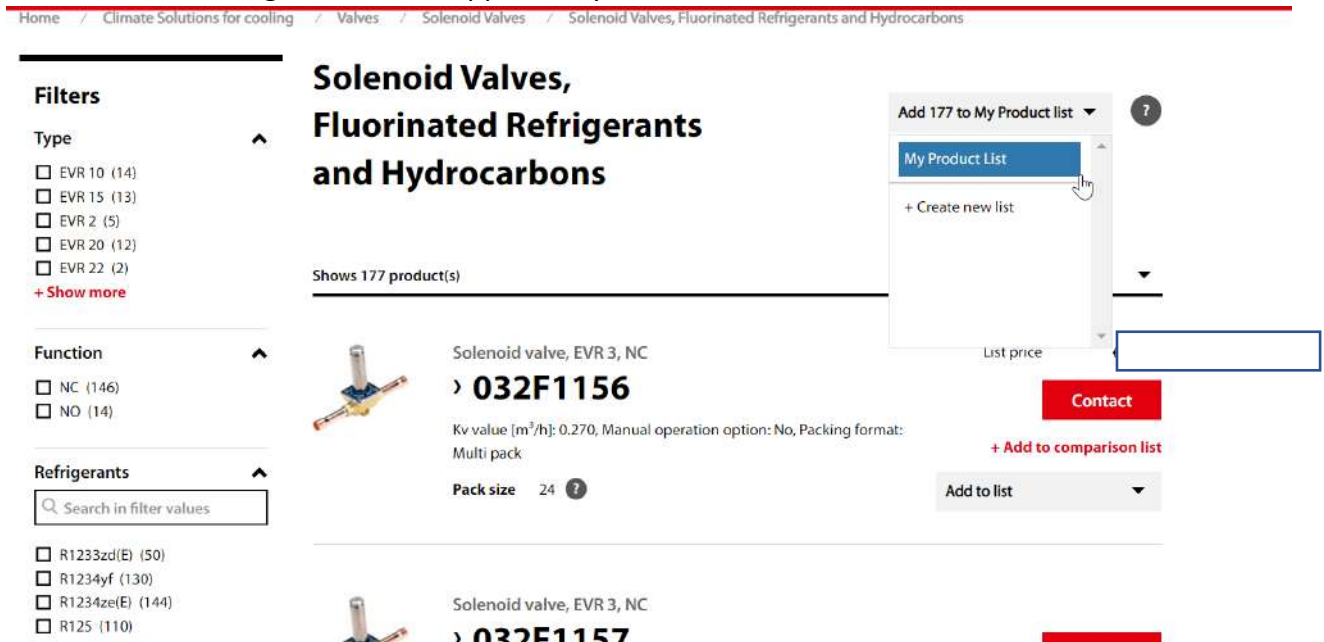

The screenshot shows the Danfoss Product Store interface. At the top is a red navigation bar with the Danfoss logo and 'ENGINEERING TOMORROW' text. Below the navigation bar is a breadcrumb trail: Home / Climate Solutions for cooling / Valves / Solenoid Valves / Solenoid Valves, Fluorinated Refrigerants and Hydrocarbons. A notification states 'You have signed out of your account.' The main content area is titled 'Solenoid Valves, Fluorinated Refrigerants and Hydrocarbons' and shows 177 products. A green box highlights a '+ Add 177 to My Product list' button. The product listings include details for 'Solenoid valve, EVR 3, NC' with model number '032F1156' and '032F1157'. Each product listing has a 'Contact' button and a '+ Add to My Product List' button, with the latter highlighted in blue in the screenshot.

For logged in users, to add all the items from the list into My Product List, the user would click the dropdown highlighted in the green box in the screen shot below. To add one particular item from the list, then they would use the dropdown highlighted in the blue box.

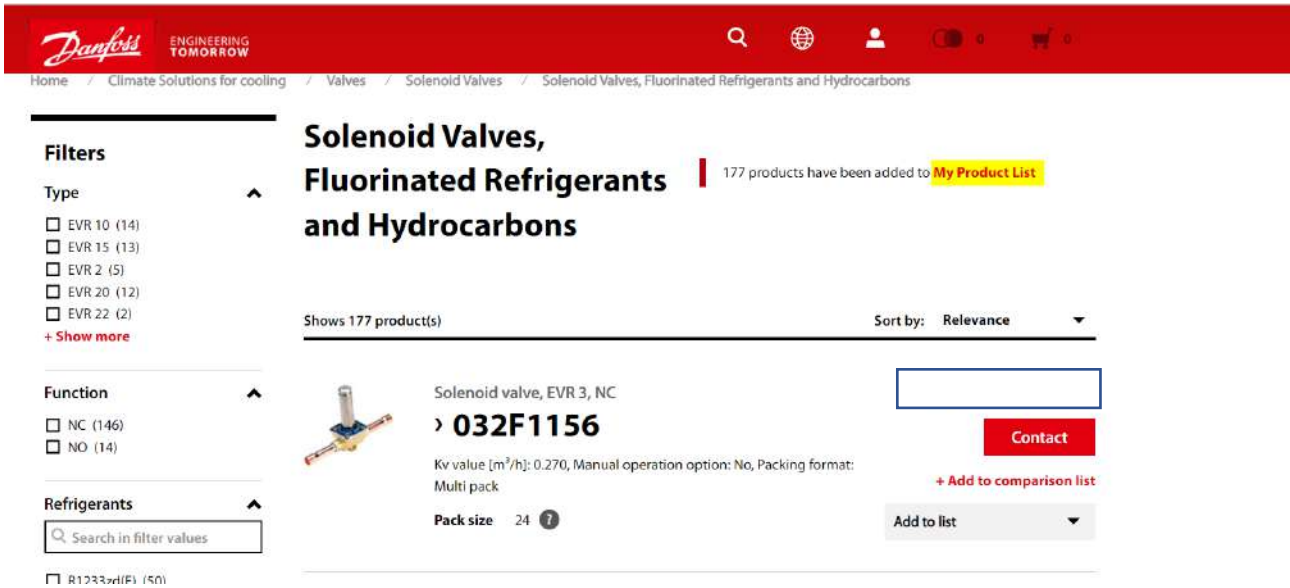

Once the dropdown is clicked, the user has the option to choose My Product List or +Create new list, which will then give them the opportunity to name the list as it is created.

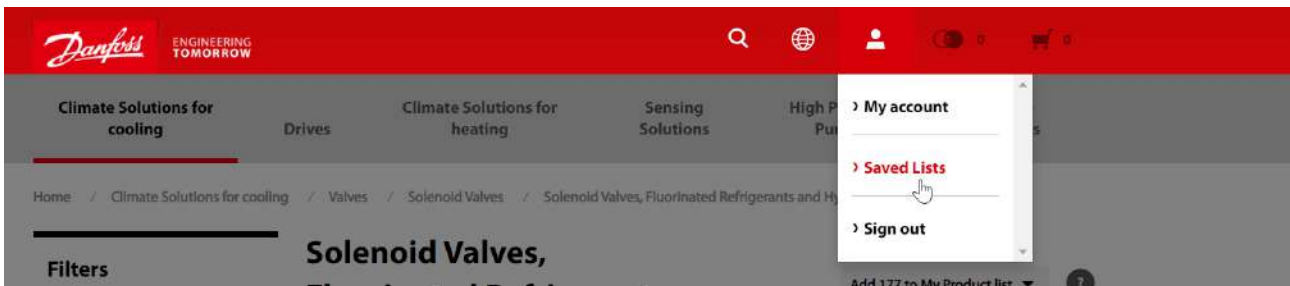

3. Accessing My Product List

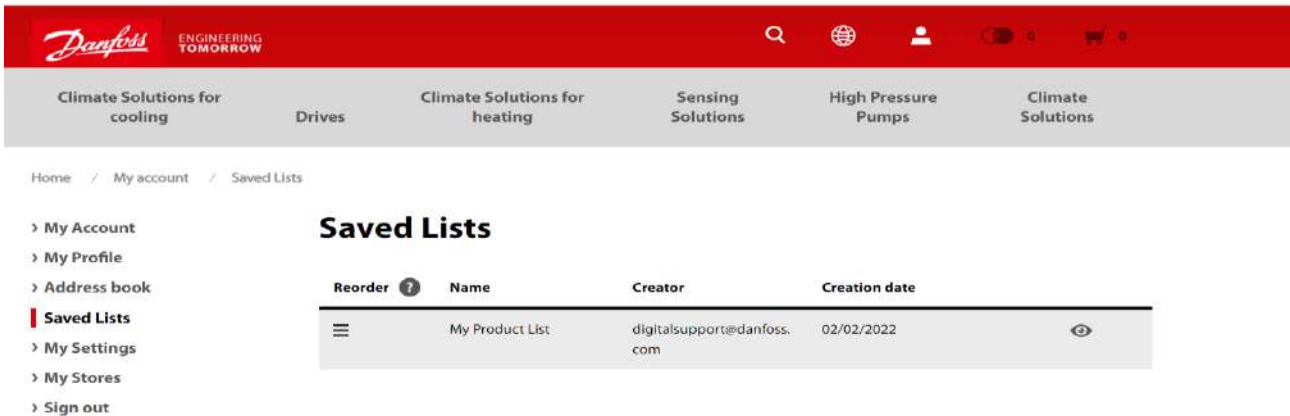

Once the products are added, there is a hyperlink (highlighted in the yellow box), which allows the user to access their list.

For logged in users, they can also access their list via the My Account area in the Saved Lists section.

There the user can see all the lists they have created and can access a particular one by clicking the “eye” icon  to the right of the list.

4. Working with My Product List

Once the list is open, the user can export the list to Microsoft Excel or as a CSV file by using the Export list in the upper right corner (highlighted in yellow) and select the radio button to the corresponding format.

My Product List Export list

Total products: 177

This list was generated from digitalsupport@danfoss.com and was initially made for Germany. Be aware that this list is always validated by country's portfolio in which store you are in. If you open it in different country store the product status may differ.

Expand all

<input type="checkbox"/> Select all	Code no.	Description	Quantity	Comments	Product status
-------------------------------------	----------	-------------	----------	----------	----------------

Export list

Choose the format of your download:

- CSV, semicolon-separated, UTF-8 Unicode
- XLSX, Microsoft Excel

Download Cancel

They can also modify the quantity on a line item.

<input type="checkbox"/> Select all	Code no.	Description	Quantity	Comments	Product status
<input type="checkbox"/>	032F1156	Solenoid valve, EVR 3, NC	1	Add comment	In Portfolio
<input type="checkbox"/>	032F1157	Solenoid valve, EVR 3, NC	1	Add comment	In Portfolio
<input type="checkbox"/>	032F1201	Solenoid valve, EVR 2, NC	1	Add comment	In Portfolio
<input type="checkbox"/>	032F1202	Solenoid valve, EVR 2, NC	1	Add comment	In Portfolio
<input type="checkbox"/>	032F1204	Solenoid valve, EVR 3, NC	1	Add comment	In Portfolio

They can select a line and either remove the item from the list or copy it over to a new or existing list by using the Delete and Copy buttons at the bottom of the page respectively.

The screenshot shows the 'My Product List' page. At the top, there is a red navigation bar with the Danfoss logo and 'ENGINEERING TOMORROW' text, along with search, globe, user, and shopping cart icons. Below the navigation bar, the page title 'My Product List' is displayed on the left, and a red '> Export list' link is on the right. Under the title, it says 'Total products: 177' and provides a disclaimer: 'This list was generated from digitalsupport@danfoss.com and was initially made for Germany. Be aware that this list is always validated by country's portfolio in which store you are in. If you open it in different country store the product status may differ.' Below this is a red 'Expand all' link. The main content is a table with columns: 'Select all', 'Code no.', 'Description', 'Quantity', 'Comments', and 'Product status'. The table contains five rows of product data. At the bottom of the table, there is a 'View: 5 | 20 | 50' selector and a '< 1 / 36 >' pagination indicator. Below the table, there are three red buttons: 'Delete', 'Copy', and 'Share list'.

<input type="checkbox"/> Select all	Code no.	Description	Quantity	Comments	Product status
<input type="checkbox"/>	032F1156	Solenoid valve, EVR 3, NC	1	> Add comment	In Portfolio
<input checked="" type="checkbox"/>	032F1157	Solenoid valve, EVR 3, NC	1	> Add comment	In Portfolio
<input type="checkbox"/>	032F1201	Solenoid valve, EVR 2, NC	1	> Add comment	In Portfolio
<input type="checkbox"/>	032F1202	Solenoid valve, EVR 2, NC	1	> Add comment	In Portfolio
<input type="checkbox"/>	032F1204	Solenoid valve, EVR 3, NC	1	> Add comment	In Portfolio

Additionally, they can insert comments by using Add comment in the Comments section.

This screenshot shows the same 'My Product List' page as above, but with an 'Add comment' modal window open in the foreground. The modal has a title 'Add comment' and a close button (X) in the top right corner. Inside the modal, there is a text input field with the placeholder 'Write here' and a label 'Write a comment' above it. At the bottom of the modal, there are two buttons: a red 'Add' button and a grey '> Cancel' button. The background of the page is dimmed to show the modal.

The user will also be able to see whether the product they selected is available for purchase from the portfolio linked to the catalog specific to the country to which they are connected under the Product Status section.

5. Sharing My Product List

To share the list with either a partner of Danfoss or a colleague who has a Buyer role in Product Store, the user can click the **Share list** button at the bottom of the screen and then they can copy the URL by clicking the **Copy link** button.

The link can be pasted into an e-mail. Once the e-mail is received, the recipient can then click on the link to go directly to Product Store.

Hi,

Please place these items on order from Danfoss using this Product Store link.

<https://q.test.store.danfoss.net/de/en/product-list/00001JPX/1065259198>

Once the recipient is taken to the Store, they can export the list, Login to save the list, or they could in turn share the list (perhaps to obtain approval).

My Product List > Export list > Login to save list

Total products: 177

Once they are logged into the Store, they are immediately presented with the My Product List and can either save the list, export the list, share the list, or select the items and add them directly to the cart. NOTE: Saving the list then creates the list under their profile and it will appear in their Saved Lists section.

Add to cart

Additional information, if the Select All is used, this will only load the selection visible on the screen and not the entire list. This is to protect the user from crashing the cart by loading a large number of products at one time.
